(54) Title: WATER VAPOR TRANSMISSION RATE RESISTANT AND REPULPABLE CORRUGATED PAPERBOARD

(57) Abstract: The present invention relates to an improvement in corrugated paperboard, and more particularly, to a water vapor transmission rate resistant coated corrugated paperboard for packaging material, which is also repulpable, wherein the water vapor transmission rate resistant coating is polyvinyladine chloride, polyethylene teraphthalate, acrylic, styrene butadiene rubber, or any mica formulation and wherein the coating is applied to at least one surfaces of the linerboard and/or the medium.

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
